CMU CRICKET SIMULATOR · PLAYER GUIDE

CMU Cricket — The Complete Match & Tournament Guide

Every way to play a match, every tour and tournament, and exactly how to start each one — written for players. Get this file any time from the bot with `/matchguide` (Markdown) or `/matchguide pdf` (PDF), or read just one part in chat with `/matchguide <topic>` — e.g. `/matchguide letsplay`.

Legend. `<required>` is yours to fill in, `[optional]` may be left out. [group] = group only · [DM] = DM (private chat with the bot) only. **Reply** = send the command as a reply to your opponent's message. **Ranked** = moves your ladder rating (see Ranked ladder).

26	During a match — pause, resume, fix	`controls`
27	Troubleshooting & FAQ	`faq`

1. Getting started

The bot is built around a community. Matches, tournaments, drafts and auctions happen in the **official group**; announcements, events and downtime notices go out in the **official channel**. Both links are at the bottom of every `/start` message.

Your first ten minutes

Step	Do this	Where
1	Join the **official channel**	link under `/start`
2	Join the **official group**	link under `/start`
3	Open a private chat with the bot and send `/start`	DM
4	`/debut` — create your account and get your starting squad	DM
5	`/claim`, `/daily`, `/gspin` — your first extra cards and coins	DM
6	`/autobuild` — the bot picks your best legal Playing XI	DM
7	`/setcaptain <player>` — choose your captain	DM
8	`/setbo` — check or change your batting order	DM
9	`/teamname <name>` — name your side	DM
10	Play! `/lpbot` to practise, then `/letsplay @friend` in the group	DM / group

```
/start
/debut
/claim
/autobuild
/setcaptain Virat Kohli
/teamname Delhi Dynamos
/lpbot                ← a practice match against the AI
/letsplay @rahul      ← your first real match (in the group)
```

Good to know before you play

- **You need a legal Playing XI.** Most matches check your top 11 before the invite is even sent. `/playingxi` shows it, `/autobuild` fixes it, `/ximage` draws it, `/cmuchem` shows its Team Chemistry.
- **New-player journey.** After `/debut` you get a checklist (join the group, `/claim`, `/daily`, play a match, open a pack, win a match). Each step pays coins/gems the first time; finishing them all pays a bonus. `/start` shows your progress.
- **Members-only (Rookie) mode / Official GC.** If the operator has switched these on, `/start` tells you; see `/membership` and tap **Yes I've joined** after joining the group.
- **Help in chat:** `/howto` (the whole bot), `/matchhelp` (the Approach game, 12 pages), `/tourhelp` (every tournament command), `/matchguide` (this file).

2. Which match should I play?

I want to…	Play	Squad used	Overs	Ranked	Rewards
Beat a friend with **my own cards**	`/letsplay`	your roster + traits	20 (or 1–20)	Yes (5+ overs)	Yes
Practise my roster vs the AI	`/lpbot`	your roster	20	No	No
My roster vs a **real franchise**	`/lpmulti`	yours vs a league team	20 (or 1–20)	No	No
Play with **franchise squads** (IPL, BBL…)	`/cipl` `/cbbl` `/cint` `/c<league>`	league teams, no traits	20 (or 1–20)	Yes	Yes
Two **different** leagues, or The Hundred	`/cmulti`	league teams	20 / 1–20 / 100 balls	Yes	Yes
Practise league cricket vs the AI	`/ciplbot`	league teams	20	No	No
Draft both XIs pick by pick	`/cdraft` [group]	drafted	20	Yes	Yes
Control **every ball** (delivery + shot)	`/playmatch`	your roster	1–20 (guest picks)	Yes	Yes
A quick 2-wicket shoot-out	`/cm`	your roster	up to 2	—	Yes
Play inside the **Mini App**	`/wpm`, `/wpmbot`	your roster	1–20	`/wpm` Yes	Yes
Result **instantly**, no clicking	`/sim`	your roster	T10/T20/ODI /Test/1–20	No	No
A quick game vs a bot team	`/vsbot`	your roster	1–20 (default 5)	No	No
Just **watch**	`/botvsbot`, `/botmatch`	bot teams	—	No	No
A **best-of series** vs one friend	`/cltour`	fixed league teams	20	Yes	Yes
A **competition** with a table & playoffs	`/lptour`, `/ctour`	roster / franchise	20	Yes	Yes
Run a franchise for a **whole season**, solo	`/rcpl` [DM]	auctioned squad	20	No	season prizes

Short version: new → `/lpbot`. With a friend → `/letsplay`. Franchise cricket → `/cipl`. In a hurry → `/sim`. Competitive → tournaments (§18–19).

3. How a match plays

Lets Play, Challenge League (`/cipl…`), `/cmulti`, `/cdraft`, `/lpmulti`, `/lpbot`, `/ciplbot`, CL Tour and tournament fixtures all use the same **over-by-over Approach game**. `/playmatch`, `/wpm` and `/cm` are ball-by-ball instead (§9–11).

Setup

1. **Invite** — the guest gets Accept / Deny (30 seconds).
2. **Pitch** — the host picks one (Flat, Hard, Even, Bouncy, Dry, Green, Dusty…). Tournament fixtures have their pitch fixed in advance.
3. **Playing XI** — shown for both sides. Batting order is set automatically by batting rating; the host can tweak with `/change <out> <in>`.
4. **Traits vote** (Lets Play only) — both captains say whether traits play. Yes + yes = on, no + no = off, a split defers to the lower-rated XI.
5. **Toss** — the guest calls heads/tails, the winner bats or bowls.

Every over

1. The bowling captain picks a **bowler** (max 4 overs each in a T20, never two in a row).
2. …then a hidden **bowling plan**: Defensive · ⚖ Balanced · ☠ Mixed · Aggressive · Variation.
3. The batting captain picks a hidden **batting intent**: Defensive · Rotate Strike · ⚖ Balanced · Aggressive · Ultra Attack.
4. Both are revealed and the over is bowled ball by ball.

What decides the over

- **Counters.** Guess the plan right and you get +8% runs; walk into a plan your intent can't answer and the bowler gets +10% wicket chance. Best replies: vs Defensive → Ultra, vs Mixed → Rotate, vs Aggressive → Aggressive, vs Variation → Balanced.
- **Don't be predictable.** The same pick 4 overs running gets read (worse up to 6); one different over resets it.
- **Phases.** Powerplay 1–6 (attack pays), Middle 7–16 (rotate; Ultra is the worst pick), Death 17–20 (Ultra is worth most, never block).
- **Pitch.** Each surface has a par score and changes for the 2nd innings — read the toss tip. `/pitchstats` shows real numbers per pitch.
- **Momentum & pressure** (−2…+2) — boundaries and partnerships build it; wickets, maidens and a climbing required rate pull it down.
- **Weather & dew** — cloud and wind change during the match; on a night match dew builds late in the match. There is no rain and no DLS.
- **Traits** (Lets Play only), **Team Chemistry** (`/chemhelp`) and **form** (last matches nudge ratings).

Impact Player

One substitution per side per match, IPL-style: before any over, tap the Impact button or send `/impact` to bring a bench player on for someone in the XI. Overseas ✈ subs only while your XI is under the overseas cap.

After the match

Batting & bowling scorecards after each innings, a summary card, a **match analysis HTML file** (phase splits, worms, win probability, every over's approach duel), and a highlights reel of the 3–5 biggest moments. Lost a card? `/lastscorecard`. A tie goes to a **Super Over** (§15).

> Deep dive with the live numbers: `/matchhelp` (or `/matchhelp approach`).

4. Lets Play

Your own collected squad, traits and all, against another player's. The flagship mode.

Start it (in the group):

```
/letsplay @rahul          ← 20 overs
/lp 5 @rahul              ← a 5-over friendly (any 1–20)
/letsplay                 ← as a reply to their message
```

Rules

- Both players need a legal Playing XI — checked before the invite goes out.
- Default 20 overs; custom 1–20 for friendlies. Tournament fixtures are always 20.
- Traits are live (after the traits vote).
- Ranked when 5+ overs; pays coins, gems, quest progress and career stats. Under 5 overs still pays and counts for rivalries, but isn't ranked.

Tips — `/setbo` saves your order so every match reuses it. `/playapp` moves the match into the Mini App so your picks stay private.

Related — `/lpbot` (practice vs AI), `/lptour` (tournament fixture), `/lpmulti` (vs a franchise).

5. Lets Play Multi

Your own roster vs a real Challenge League franchise (e.g. your XI vs Mumbai Indians).

```
/lpmulti AI               ← you pick League → Team; the AI captains it
/lpm AI 10 app            ← 10 overs, played in the Mini App
/lpmulti @rahul           ← Rahul accepts, picks League → Team and captains it
```

- The franchise fields its best legal XI automatically; the rest of its squad is the Impact Player bench.
- From the pitch onwards it is the normal Lets Play flow (`/change`, toss…).
- Leagues offered are the ones admins tick **Include in Multi**.
- **Always unranked** — no stats, POTM, coins, gems or W/L.

6. Challenge Leagues — CIPL, BBL, INT…

Franchise cricket with fixed squads — IPL, BBL, Internationals, and any league an admin adds. No traits: it's pure ratings and captaincy.

Start it — reply to your opponent's message in the group:

```
/cipl          ← IPL challenge
/cbbl          ← BBL
/cint          ← International
/cipl 6        ← a 6-over friendly (1–20)
/challengeIPL  ← long form, same thing
```

Flow: host picks a team → guest picks a team → host picks the pitch → both pick a Playing XI (numbered squad list, tap or type numbers) → toss → overs. Each setup turn has **5 minutes** (reminder at 4:30); nobody is fined for a challenge that times out before the match starts.

Rules — the league's own XI rules apply (keeper, five bowling options, overseas cap). Ranked, pays rewards. Any admin league answers `/c<league>` and `/challenge<league>`; add `bot` (e.g. `/ciplbot`) to play the AI.

7. Multi League & The Hundred

Each side picks its own league, then a team — e.g. MI vs Sydney Sixers.

```
/cmulti          ← 20 overs (reply to your opponent)
/cmulti 10       ← 10 overs
/cmulti 100B     ← The Hundred: 100 balls a side
/cipl multi      ← the long form still works
```

The Hundred is always 100 balls — don't add an over count with it. Hundred leagues, tournaments and CL Tour matches always play full length.

🃏 8. Challenge Draft

Both captains build an XI pick by pick, then play. [group] Group only.

```
/cdraft        ← open it; a second player joins
```

- The bot deals **11 slots**. Each slot offers two cards of the **same role within a point of OVR** — the captain on the clock takes one and the other goes to the opponent.
- Career cards are never dealt.
- After 11 slots it is an ordinary Challenge League match: pitch, XI screen, toss, overs, Super Over on a tie.

9. Play Match — ball by ball

Full control of every delivery. The bowler picks a delivery (and length for pacers), the batter picks a shot, every ball.

```
/playmatch @rahul     ← or /pm, /match
```

- Uses your roster and Playing XI. After accepting, the guest picks the overs (1–20).
- Each action has a timer: a warning at 45s, a forfeit at 90s (with a fine).
- `/endmatch` ends it early — a fine scaled by balls bowled is **burned**, not paid to your opponent.
- Ranked and rewarded (coins per over for winner and loser).

⚡ 10. Two-wicket Challenge

A fast shoot-out: **2 wickets per innings, up to 2 overs**, in the Mini App match flow.

```
/cm @rahul       ← or reply to them with /cm
```

Both XIs must be legal; only one challenge can wait in a chat at a time.

11. Mini App match lobby

A match played inside the Cricket Simulator Mini App.

```
/wpm 10            ← an open 10-over lobby anyone can join
/wpm 10 @rahul     ← invite one player directly
/wpmbot 20         ← vs a bot team, in the Mini App
/app               ← just open the Mini App
```

- 1–20 overs. `/wpmbot` has an autoplay toggle to let the AI play your side.
- Any over-by-over match can also move to the Mini App mid-game with `/playapp` (and back with `/playchat`).

12. Instant Sim — T10, T20, ODI, Test

The whole match is simulated at once — scorecard, winner and a ball-by-ball commentary file.

```
/sim            ← T20 vs an auto-generated Sim XI
/sim T10
/sim 12         ← custom 1–20 overs
/sim ODI        ← 50 overs
/sim Test       ← five days: sessions, new balls, follow-ons, declarations, draws
/sim            ← as a reply to a player: your XI vs theirs
```

Format	Overs	Max per bowler	Powerplay	Death from
T10	10	2	1–3	8
T20	20	4	1–6	16
ODI	50	10	1–10	41

Format	Overs	Max per bowler	Powerplay	Death from
Test	5 days	—	—	—

- Uses your saved batting order (`/setbo`); only bowlers and all-rounders bowl.
- **Cooldown: 4 hours** (shorter on paid tiers). Replying to a player is a challenge: it uses **both** players' cooldowns, so you can't challenge someone who is still on cooldown. A rejected command never costs you a sim.

13. Play against the bot

Command	What it is
`/lpbot [chat|app]`	**Lets Play vs the AI captain** — your roster, 20 overs, Approach game. Pick your new batsman after each wicket
`/ciplbot [league] [chat|app]`	**Challenge League vs the AI** — you pick team, pitch and XI; the bot takes another team and fields its best XI. `/ciplbot bbl app`
`/vsbot <overs>`	Your XI vs a pre-built bot team, in chat (1–20, default 5)
`/wpmbot <overs>`	The same in the Mini App
`/lpmulti AI`	Your roster vs an AI-captained franchise (§5)

```
/lpbot          ← remembers chat/app from last time
/lpbot app
/ciplbot ipl chat
/vsbot 10
```

`/lpbot` and `/ciplbot` are **unranked practice**: no stats, POTM, coins, gems, W/L or streak — and walking away mid-over costs nothing. The bot's picks stay hidden, just like a human's.

14. Watch bot vs bot

```
/botvsbot      ← pick two bot teams and watch them play
/botmatch      ← spectate a bot-vs-bot match
```

Pure entertainment: no rewards, no stats.

15. Super Over & Bowl-out

Super Over (automatic on a tie)

In `/letsplay`, `/cipl//c<league>` and `/cdraft`, a tie goes to a Super Over played like a 1-over `/playmatch` — delivery and shot picks every ball.

- Each side: max **6 legal balls or 2 wickets**, whichever first.
- Wides/no-balls add runs and are re-bowled; byes/leg byes are legal balls.
- The side that batted **second** bats first in the Super Over.
- Still level after countback? Another Super Over — players already used are spent.

Bowl-out

A tie-breaker and a standalone game: each side picks 5 bowlers, 10 deliveries are bowled at the stumps, most hits wins; level → sudden death, one ball each.

```
/pbo @rahul      ← a standalone player bowl-out (or /bowlout)
```

16. Challenge League Tour (series)

A best-of-3, 5 or 7 series between two players with fixed franchise teams.

```
/cltour @rahul     ← create (or reply)
/cltour            ← show your tour and the "Play Match N" button
```

1. Host picks a league → host picks a team → guest picks a team.
2. Host picks the length: **3, 5 or 7** matches → guest accepts.
3. Each match is a normal `/cipl` match (pitch, XIs, toss, overs), always full length. Only the next unplayed match can be started.

17. Friendly Tours

A personal multi-match tour against one player.

```
/cmtours @rahul    ← create: matches (3–6) → overs (5/8/10/15/20) → invite
/mytours           ← your tours: play the next match, info, stats
```

18. Lets Play Tournament

A league of players — each fixture is a normal Lets Play match with your own roster, feeding a points table with NRR, leaderboards and optional playoffs.

How to join: a bot admin enters you by Telegram id. Ask in the group.

Play your fixture (reply to your opponent, or tag them):

```
/lptour @rahul
```

Follow it

Command	Shows
`/lpt`	Front page — table, fixtures, teams
`/lptable`	Points table (P W L T · Pts · NRR)
`/lptfixtures`	This round's fixtures, with your next matches on top
`/lptteams`	Who is in it
`/lptstats`	Leaderboards — runs, wickets, sixes, average, economy

Rules the bot enforces

1. The tournament must be **running** (not draft/paused/finished).
2. Both players must be **entered**.

3. Your pairing must have a fixture in the **open round** — rounds open one at a time. (A tournament with no schedule is free play: anyone vs anyone.)
4. Both need a legal Playing XI.
5. Fixtures are always 20 overs. The fixture is claimed at the toss, so a denied invite costs nothing.

Formats: single or double round-robin; playoffs none / top 4 / IPL playoffs / knockout.

19. Challenge League Tournament

A franchise tournament — teams are owned (and co-owned) by players, squads come from the league (or from a draft/auction), every fixture is a `/cipl` match.

Play your fixture — use your league's tournament command, as a reply to the opposing owner, e.g. `/tipl`. The pitch is fixed per fixture (home ground if set). Owners: `/thome <team> | <stadium>` sets your home ground.

Follow it

Command	Shows
`/ctour`	Front page
`/cttable`	Points table
`/ctfixtures`	Schedule, one round at a time
`/ctteams` · `/teamowner`	Teams and their owners
`/clsd <team>`	One team's schedule, form and results
`/teamtourstats [team]`	A team's tournament by the numbers
`/ctinjuries`	Who is injured and for how many matches
`/tournamentstats` · `/statstour <player>`	Stat boards · one player
`/mvp`	Most Valuable Player table
`/tteam`	Team of the Tournament
`/tbracket`	Playoff bracket picture

Several at once. Each league can run its own tournament in parallel, with its own commands — for `/tipl`: `/tiplinfo`, `/tipltable`, `/tiplfixtures`, `/tiplteams`, `/tiplinjuries`, `/tiplstats`, `/tiplmvp`, `/tiplplayer <name>`. The general commands list them all when more than one is running.

`/tourhelp` puts every tournament command on one card.

20. Tournament Draft

How franchise owners build their squads, live, pick by pick, from a player pool the admin uploads. [group] Runs in the group it is bound to.

Command	What it does
`/pick <player>`	Make your pick when you're on the clock
`/dboard`	Live board — who's up, time left, recent picks
`/dsearch [filters]`	Browse the pool — available / taken
`/dsquad [team]`	A squad by tier, slot progress, overseas count
`/dqueue <player>`	Your wishlist — used if your clock runs out
`/dtrade <team>` · `/dtrades` · `/dtradecancel`	Trade after the draft · the log · cancel your offer

Rules: a slot's tier is a ceiling (a Platinum slot can take a Gold player, but the slot is spent); the overseas cap refuses a pick that breaks it; role minimums (keeper, bowlers) are enforced while you still have slots to obey them. When done, the admin publishes the squads into a Challenge League and the tournament (§19) begins.

21. Franchise Auction

IPL-style auction in the group: every franchise has a purse, players come up in sets, the room bids.

```
/bid           ← bid the next minimum (the safest, fastest bid)
/bid 15        ← ₹15 Cr      /bid 75L ← ₹75 lakh
.bid           ← dot shortcut (also .purse .squad .board .lb .mybids)
```

Command	What it does
`/aboard`	Live board with quick-bid buttons
`/apurse [franchise]`	Purses, max bids, squad counts, RTM cards
`/asquad [franchise]`	A squad with purse and max bid
`/ainfo` · `/arules`	Where it stands · every number it runs by
`/asets` · `/anextset` · `/anextplayer`	Sets and who is next
`/asoldlist` · `/aunsoldlist` · `/aretained`	Sold, unsold, retained
`/aleaderboard` · `/amybids`	Spend ranking · your bid history
`/artm yes|no`	Answer a Right To Match on your former player
`/atrade <team>` · `/atradehelp`	IPL-style trades, before/during/after

The clock (default): a lot opens with 60s; a bid with under 40s left puts it back to 40s; ⚠ 1st warning at 20s, ⚠⚠ 2nd at 10s, then a 5-4-3-2-1 count and SOLD/UNSOLD. Retention and RTM work like the real IPL. Read-only commands also answer in DM. Full guides: `docs/Franchise-Auction-Guide-Users.pdf`.

22. Auction League — solo career

Run one franchise for a whole IPL-style season, alone, in DM — the AI runs everyone else. [DM]

```
/rcpl            ← the hub: start, continue, or see the last career
/rcpl IPL        ← straight to that league's teams
/rcpl help       ← the full guide (/alhelp)
```

1. **Pick your franchise**, AI retentions on/off, AI difficulty (Easy/Normal/Hard). Entry fee **100 gems** per season.
2. **Retention** — keep up to 3 (₹18 / 14 / 10 Cr). Sides that keep ≤ 2 get an RTM card.
3. **Auction** — purse ₹120 Cr; sets Marquee → rating bands by role → Emerging → Accelerated. Each AI raise: **Bid**, **Jump** or **Pass** (20s). ⚡ Fast, Skip player (`/skipplayer`), Pause (`/alpause`/`/alresume`), `/simset [n]`, `/simtolast`.
4. **Squad rules** — ≥ 4 BAT, 4 BOWL, 1 WK, 2 AR; ≤ 18 players, ≤ 8 overseas.
5. **Trade window** — AI offers + up to 2 swaps of your own (`/altrade`).
6. **Season** — round robin + IPL playoffs. `/alplay` plays your next match (ball by ball, 20 overs; AI matches are simmed). `/altable`, `/alfixtures`, `/alstats`, `/alsquad`, `/alpurse`, `/alcard`.
7. **Career** — Start Season N+1; ratings move with performance; `/alhof` is the Hall of Fame. `/alquit` discards (fee not refunded).

Prizes per season: champions 25,000 coins + 15 gems, runners-up 10,000 + 5 gems, playoffs 4,000 coins (once per season, max one paid season per 48 h, not if you conceded a match). Matches themselves are unranked.

23. League Seasons

A competition (e.g. "IPL") played season after season, with a history of champions. Each new season starts by mega auction, mini auction or manual teams.

```
/seasons                  ← every season: champion, runner-up, caps
/seasons IPL              ← one competition
/seasons Virat Kohli      ← one player, season by season
```

24. Fantasy League

A weekly fantasy cricket league: pick a squad in the Mini App, score points from real in-bot performances.

Command	What it does
`/fantasy`	Open the league and the squad picker
`/myfantasy`	Your squad and points
`/fantasyleaderboard`	The leaderboard
`/fantasystats`	Top scorers this week
`/fantasyguide`	The rules

25. Ranked ladder, rivalries & rewards

Ranked ladder

Every completed match between two players (Lets Play, CIPL/Challenge League, `/playmatch`, `/wpm`, Super Over and bowl-out finishes) moves both ratings. Beating a stronger player pays more.

Division	Rating
Bronze	below 1050
Silver	1050
Gold	1150
Platinum	1250
gems Diamond	1350
Legend	1450

- First 10 matches are placements (bigger swings).
- Monthly season: with 5+ ranked matches you're paid by division (Silver 1,000 coins → Legend 20,000 coins + 10 gems); ratings then reset halfway to 1000.
- The same pair can move each other's rating 3 times per UTC day.
- Never rated: bot matches, `/lpmulti`, under-5-over friendlies, "won't count" mismatches.

`/rank` · `/ranked` · `/rivalry @user` · `/h2h @user`

Rivalries

After 5 meetings two players become a named rivalry: series score on every result card, +250 coins per rivalry win, and rounds of 5 (winner of a round: +3,000 coins + 2 gems). Bonuses count 5+ over matches, up to 3 per pair per day.

Match rewards

Winners and losers earn coins per over played (defaults 300 / 150, operator configurable), plus gems, quest progress (`/myquest`), achievements and career stats. Unranked practice modes pay nothing.

26. During a match — pause, resume, fix

Command	What it does
`/matchinfo`	Striker, bowler, score, target
`/impact`	Open the Impact Player picker
`/change <out> <in>`	Swap a player in your XI before the toss
`/pause`	Save a Lets Play / Challenge League match exactly where it is
`/continue <MatchId>`	Carry it on from that ball, in any group (other captain taps Yes Ready)
`/saved`	Your paused, cleared and timed-out matches
`/resume` · `/rcl [MatchId]`	Buttons disappeared? Bring the match back
`/playapp` · `/playchat`	Move the match to the Mini App / back to chat
`/endmatch`	Ask to end your match (a fine applies)
`/clearmatches`	Clear a stuck match in this chat (it is saved first)
`/lastscorecard`	Re-send the last scorecards in this chat

27. Troubleshooting & FAQ

"Your XI is not valid." Run `/autobuild`, then check `/playingxi`. You need a keeper and enough bowling options.

The buttons vanished. `/resume` (or `/rcl`, or `/rcl <MatchId>`).

The chat is stuck with an old match. `/clearmatches` — a Lets Play / Challenge League match is saved first, so `/continue` it later.

"There is already a challenge waiting in this chat." One lobby per chat: finish or let it expire, or play in another group.

My opponent has no @username. Reply to their message with the command.

My tournament fixture won't start. The tournament may be paused, your fixture may be in a round that hasn't opened, or one of you isn't entered — the bot's reply says which. Check `/lptfixtures` or `/ctfixtures`.

Why didn't my rating change? Bot matches, `/lpmulti`, under-5-over matches and the 4th+ match of the day between the same pair are not rated.

`/sim` says I'm on cooldown. It's every 4 hours (less on paid tiers).

Something else? `/report <message>` or `/feedback <message>` reaches the admins.

Commands and numbers here are the defaults; an operator can change cooldowns and rewards, and the bot's own replies (`/arules`, `/rcpl help`, `/matchhelp`) always show what is live. Get this guide again with `/matchguide`.
